The year 1874 passed over without any sign of an inten- case tion to proceed with the new schools, but it was then believed that the typhoon of last autumn had arrested operations, and with hope renewed the masters looked forward to the spring of the present year as being certain to witness the inauguration of inquiries being made. the work. But they have once more been doomed to disappointment. Nothing has been done; there is seemingly no hope of anything being done this year. No doubt the plea will be that the Praya wall is of primary to make this Work in every way suitable importance, that the Civil Hospital claims second rank, and that the state of public funds will not permit of all of them being carried out at present. If so this is greatly to be regretted, for a fine and useful institution is thereby being seriously crippled Orders for Copies may be sent to the Daili in its work. THE BLOCKADE OF HONGKONG BY CHINESE CUSTOMS CRUISERS. There is not much comfort derivable from perusal of Lord Carnarvon's despatch in raply to the memorials sent from Hongkong in reference, to the blockade of the port by Chinese Customs cruisers. It really amounts should form the basis of a new contract, sutis. | when stripped of official verbiage, to a declafactorily arranged the question of passenger ration that the exercise of the right of search complained of in close proximity to Hongkong, for the purpose of defeating attempts on the part of Chinese subjects to defined the revenue of their country, does not affect the freedom of the port and affords no valid ground for diplomatic remonstrance; that detvours to remedy a state of things "which exposes the Colony to the imputation of

refusal to listen to the memorial would have been preferable. It is no consolution to read at the conclusion that Lord Carnarion regrets to be unable "to concur in the views of so large and influential a majority of the mercantile community of Hongkong," &c. Such regrets avail nothing to remedy an undoubted grievance, and cannot be received as a sop. The present Government, which vigorous foreign policy, has in almost hopes formed, when it first assumed control imagined that the prestige of the country was safer in the hands of men unembarrassed by any pledges of grinding economy, and who had a substantial majority at their back unlikely to disintegrate on sectarian questions. But these hopes have so far scarcely been fulfilled. Mr. DISRABLIS Ministry is not what it was expected. It has no energy; its measures are all permissive; it never essays legislation or takes action that calls forth anything like insistance. As the Salurday Review very neatly puts it, the Ministry "wants backbone. It wants to be less like a better sort of jelly fish. It wants mind and purpose. It decides on nothing, faces nothing, means nothing. Its Bills benefit no one, and hurt no one. They are like stuffed figures with rusty muskets shamming to be a regi- to Reserve Fund. ment of soldiers." They try to please everybody at home: they intend to conciliate every power abroad. But this policy must not be carried too far. The result of the action of Lord Carnaryon will assuredly be to give to the Chinese Government further license and warrant for drawing still more tightly the cordon they have established round the commerce of this port. When it has got to such a pass that international rights are threatened, and trade nearly paralysed, the Home Government will find it incumbent upon them to interiere. Meantime we can only wait the course of events, which can but glide from bad to worse.

In the latter case this tem would have to be fully explained, as also the recent transfer by Messre. Heard & Co., of the Novelty. Iron Works a valuable property. There may be other little points requiring elucidation, but I am not of course in a position to encoify them. With the existing arrangement I for one cannot be fully satisfied, and I am aulikely to be entremched upon and to disappear money is stated to be in hand but is not forthcoming it is a far different and mu h more serious matter—us our late General Agents would have speedily found bad this occurred in Loudon-where reputation is not lightly claimso: the China Traders' Company upon them should have been first, satisfied. I therefore, for my own part and for others, strongly recommend, that the Company be wound up, and I hope that the requisite steps to this end will be taken. One remark in conclusion : at the previous meeting, I suggested that a sum of money should be allowed by the Com-

ind begging them to attend to vote for the Deed of Assignment for the sake of his family. Another remark and I have done; when I was arging the Committee to protect the Company's money, Mr. Albert Heard informed me, through one of the Committee men, that I need not put myself to any inconvenience, because they could control the Shares and so defeat my object. I need not comment on this. since writing the loregoing I bere received the printed statement of Account to be presented to this Meeting, but as it was only delivered to me 2 hours ago I have not of course had even time to consider it. But so far I decidedly object to such important measures being passed at an hour's notice. I think that in common lairness the proprietors generally, more copedially at other places, Shanghai, &c., should have the opportunity of ully considering the important alterations specified in the circular. As before stated, I eg to propose that the Company be wound up. If this does not meet with favour at your hands, then have to propose that this meeting be adjourned for a month to consider the matters

FOR comprehensiveness and practical service this Work stands unrivalled. All the new words which the Chinese have of late years been compelled to coin to express the numerous ohjects in machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are here given in extenso. Each and every word is cises for students of a most instructive nature. Billiard Table Both the Court and Punti pronunciations are given, the accents being carefully marked on the best principle hitherto attained. Thetypography displays the success of an attempt to make the Chinese and English type correspond in the size of body, thereby effecting a vast economy of space, achieving a clearness not previously attained, and dispensing with those vast margine and vacant spaces which have heretofore characterized Chinese publications. To illustrate the yest scope of the work, the following facts are submitted for consideration. Chalcaers' Vocabularly contains about 16,000 Chinese characters, and Medburst's English and Chinese Dictionary about 100,000, whilet this work contains more than 50,000 English words, and upwards of 600,000 Chinese characters. Again, despite all the grammars and other elementary works as yet published, the student of this difficult language absolutely requires examples to display the various applications and equivalents of different words which have one general meaning. Of these examples | Price Lists, Catalogues, and all information this work contains, more than five times as many as any other Dictionary bitherto pub-

For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who understands English to communicate effectively with natives who understand nothing but Chinese. In this respect the work will be found indispensable to all Europeans residing in China, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. To parties resident in England and interested in Obina it cannot but be invaluable occasionally. It comprises upwards of two thousand large
